

STM32F401xx MCU Header File

GPIO Base Address to
Code Conversion Macros

```
graph RL; A[GPIO Base Address to Code Conversion Macros] --> B[STM32F401xx MCU Header File];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow pointing from right to left. The box on the right is shaded gray and contains the text 'GPIO Base Address to Code Conversion Macros'. The box on the left is white with a black border and contains the text 'STM32F401xx MCU Header File'. This indicates that the GPIO macros depend on or are defined within the MCU header file.
